### StarLeaf platform – secure by design

Our secure architecture, rigorous control processes, and the ability to effectively manage risk and avoid service outage make StarLeaf reliable and seamless.

- StarLeaf takes care of your sensitive data with secure and certificate-based authentication and our industry-unique 99.999% SLA uptime guarantee and ISO/IEC 27001 certification
- The StarLeaf platform comprises multiple global points of presence, that encrypt and secure your data traffic
- Our data jurisdiction guarantee means you choose and control the location where your data is processed and stored

### Rooms optimized with StarLeaf

Uniquely in the industry, StarLeaf is truly built for the enterprise. StarLeaf makes instant collaboration possible for any meeting space, including:

#### Huddle rooms

(up to 4 people) maximize the use of smaller spaces. Easy to install and provision.

#### Conference rooms

(up to 20 people) give you total flexibility, excellent video and audio with a choice of screen support and accessory options.

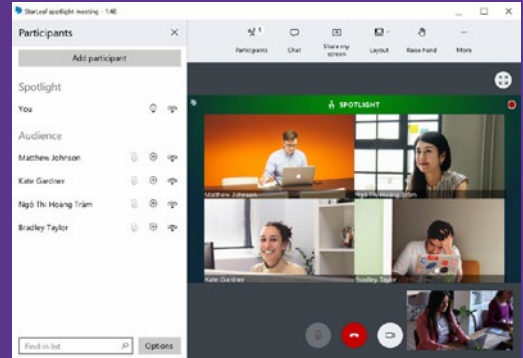

#### Boardrooms & auditoriums

(more than 20 people) designed for professional AV integration; makes presenting and collaboration in larger spaces more practical.

## Feature-rich meetings experience

The StarLeaf range of meeting services enables superior collaboration with exceptional quality.

- Meet with up to 100 participants in a single meeting
- Integrate with your existing tools including Microsoft Teams and Slack
- Schedule meetings in Outlook and Google calendar for a seamless workflow
- Stay in control of your important town hall meetings with Spotlight
- Reach a larger audience with StarLeaf live streaming
- Telephone dial-in with more than 50 countries

## Total control of your important meetings

- Control your meeting effortlessly by adding, removing and muting participants
- Capture all audio, video and screen sharing with StarLeaf Encore recording

## Meet better with anyone, anywhere

- Join from anywhere on any device with one touch. No complex dialing codes
- StarLeaf is interoperable with all major business video conferencing services
- Invite anyone to join you, all you need is their email address

## Team messaging and collaboration

StarLeaf enables unlimited one-to-one and group messaging on all your devices with persistent chat and call history.

Features include:

- Enhanced presence to see who is available, offline, in a call, or set as do not disturb
- Send and receive all files including videos, images, and documents
- Jump straight from a chat into a voice or video call or meeting

## Automated management and control

StarLeaf meets enterprise requirements for simplicity, control, and security with our suite of automatic centralized management tools:

- Securely manage and provision users via our online hub; the StarLeaf Portal, or through our integrations with user provisioning tools such as Microsoft Active Directory and Okta
- Analyze user activity and room utilization to ensure you get the most out of your StarLeaf deployment
